6	GUITAR 1	14	VOX 5(supplied)
7	GUITAR 2	15	VOX 6(supplied)
8	SAX(wireless)	16	XXX

Monitor Requirements:

The Rhythm Junkies carry a self contained in-ear monitor system. No wedges are required and it is preferred that wedges be cleared from stage.

In addition to an IEM console, the system contains two 35ft. 16 channel snakes (1 fan, 1 stage box) to split signals to monitor console and FOH console. All inputs from stage (except drum mics{toms, overheads}) must route to IEM stage box first. Tom & overhead channels are directly plugged into FOH stage box. Therefore, it may be advisable to locate IEM stage box next to FOH stage box. The fan side of the IEM whip is then plugged into FOH stagebox. The IEM stage box is labeled with each instrument and stage lines must be plugged in accordingly. The fan side is labeled with each instrument name so it is easy to assign FOH channels in any desired order.
